# **INTRODUCTION**

The Annual Volunteer Survey was conducted from June – August 2010 and 81 percent of the Volunteers (5, 239) responded, the highest number in the 35-year history of the survey. Most Volunteers (89 percent) completed the online version of the survey, and another 11 percent completed a paper version of the survey.

This report conveys the responses to the survey from Volunteers serving in one particular country. The report contains the tables and short narrative responses from the questions offering a finite set of possible responses. The results provide a picture of the activities, experiences and views of Peace Corps Volunteers in 2010, including areas where Volunteers confirm that their needs are being well met and where improvements may be needed.

A second report contains the Volunteers' extensive narrative responses to eight open-ended questions on the survey. The report, *2010 Annual Volunteer Survey Open Ended Responses*, is being distributed separately to the Regional and Country Directors.

### **ORGANIZATION OF THE REPORT**

The country report contains eleven sections, corresponding to the major sections of the survey questionnaire.

The tabular results are presented in the order in which the questions appeared in the 2010 AVS, which corresponds roughly to the phases of Volunteer service. Initial questions asked about preparing for Peace Corps. These were followed by questions about assignment activities and training. The final set of questions asked about extending service beyond two years.

The tables show the <u>percent</u> of post respondents that selected each choice and the <u>total number</u> of post respondents that answered the question. Most survey questions asked respondents to select one answer from a set of choices. The percentages for the "select one" responses add up to 100 percent. Questions that allowed Volunteers to "mark all that apply" result in percentages that total to more than 100 percent. This is because each percentage equals the number of respondents selecting that choice divided by the number of respondents who answered the question.

The 2010 AVS included most questions from earlier annual and biennial surveys. A dozen open-ended questions were excluded this year to reduce the reporting burden and internet connection costs to Volunteers.

2010 Annual Volunteer Survey: TANZANIA

Key questions were added to gather more information about:

- Experiences with insensitive comments and behavior based on race, ethnicity, age, gender, or sexual orientation
- Observations or comments about harassment/discrimination experiences (added to the online 2010 AVS after the survey began)
- Reasons that might influence whether or not to extend Volunteer service beyond two years

A crosswalk between the 2009 and 2010 questions is posted on the OSIRP intranet under 2010 AVS Reports "Reference Documents." Earlier surveys and global, regional and post reports are also on the OSIRP Intranet.

### HOW TO USE THE INFORMATION

Posts are encouraged to share the results with staff and Volunteers. These reports are an excellent way to initiate a dialogue with staff and Volunteers at post about what is working well and areas for improvement. In the past, posts have found it useful to share the results with their Volunteers, via the VAC, monthly newsletters, summary bulletins, and presentations at PST and IST.

Please consider comparing these 2010 results with your 2006, 2008 and 2009 survey results to identify trends and changes over time. You may also want to compare your country's results with the regional and global numbers.

# A. Basic Information

This section reports on the overall response rate and percentages of online and paper surveys completed, as well as the Volunteers' descriptions of their project and site. Results are more representative of all Volunteers at post when the response rate is above 50 percent.

The 2010 Annual Volunteer Survey response rate for TANZANIA was 60%.

## K. Demographics and Factors Affecting Extensions

This section reports on the age and gender of all respondents. It also reports on the importance Volunteers place on various factors that may influence their decision to extend or not extend their service beyond two years. Volunteers who answered that they either were considering an extension or were already serving beyond two years were asked to rate nine "motivating" factors and nine "challenging" factors. Volunteers could also write in any of their own motivating or challenging factors not included in the list.
