Name:						
WebQuest: Improving Food Security						
What is food security? Think of a way that each factor listed below could potentially impact food security, including the availability of food, people's access to food, or people's nutrition or food utilization.						
Factor	Possible example	Possible effects on food security				
Political strife	Armed conflict prevents farmers from working	Availability: Locally produced foods may not be present for people to eat Access: Farming families will have less money to purchase food				
		Utilization: People may not get the variety of foods they need				
Natural disaster		Availability:				
		Access:				
		Utilization:				
Social circumstances		Availability:				
		Access:				
		Utilization:				
What are the bene	fits of being able to m	nake predictions about food security challenges?				

and kinds of resources are available near you to support eating locally? w do you think food banks influence food security (availability, access and utilization)? and types of services do food banks in your area provide? od security in the U.S. w does food security in your state compare with the rest of the country? Who is most affected by food insecurity? w do you think government food assistance programs (SNAP, WIC, or School Meals) influence food security in the S.? Who do each of these programs assist?		s "eating local" influences food security (availability, access, and utilization)?
