

Name:

WebQuest: Reversing the Spread of HIV/AIDS

Directions: Record the information you collect for each of the WebQuest sections below

What do you know about HIV/AIDS?

Create five *Fact or Myth* questions about HIV/AIDS. Include an explanation for each answer.

Question

Fact or myth? *HIV can be spread by mosquitoes or other biting insects.*

Explanation

Myth. *HIV cannot live inside or be transmitted by an insect. HIV is transmitted by sexual contact, needle sharing, or being born to an infected mother.*

HIV/AIDS in the U.S.

Looking at HIV/AIDS rates nationally, what trends do you notice?

How do your state and county compare to other parts of the U.S.?

HIV/AIDS in the world

Check all of the world regions that have countries where more than 1 in 10 people are living with HIV.

- Sub-Saharan Africa East Asia Western and Central Europe Eastern Europe and Central Asia Caribbean
 South and Southeast Asia Oceania Middle East and North Africa Central and South America North America

In which parts of the world does the U.S. provide the most financial support for AIDS relief? Why do you think the U.S. would commit to supporting international AIDS relief efforts?

How are Peace Corps Volunteers addressing HIV/AIDS?

As you review the stories from Peace Corps Volunteers' communities around the world, record the strategies people are using to raise community awareness or support those affected by HIV and AIDS.

Country

Strategies

Botswana

Starting community-based HIV prevention programs; providing support for orphans and vulnerable children; encouraging people to get tested for HIV

Paraguay

Dominican Republic

Kenya

Ukraine

Namibia

Kyrgyzstan

Educating Your Community

Considering your school or community, what do you think is the most important message people need to hear about HIV/AIDS? Why do you think this message is important?

What strategy would you use to share this message? Why do you think this strategy would work the best?

What sources of information would you consult?
